

Workday Gets a Refresh

Beginning June 7, you may notice some changes in the colors, buttons and screens of Workday. Workday's look and feel has been redesigned to provide a more streamlined user experience.

What's Different?

Visual styling changes have been made in places like the Home page, buttons and icons similar to recent changes on mobile as shown below:

Benefits:

- Greater color contrast and larger font sizes for improved readability
- Access your inbox and notifications directly from the Workday Home page
- Consistency across platforms and devices

These changes may affect training materials at your agency or institution. Job Aids on Workday Help will be updated on an ongoing basis.
